

February 2023

Dear Parents and Carers,

This week we celebrate 'Safer Internet Day' on Tuesday 7th February. The theme for this year is 'Want to talk about it? Making space for conversations about life online'. Our internet safety champions have presented an assembly to the whole school with the focus on using the internet safely. All children are now aware of the importance of this.

We would like to give each child the opportunity to design and create their very own internet safety poster. The children can use the information that they were given during our assembly this week or research their own ideas using the internet themselves at home whilst of course making sure they use the internet safely. They could even create their poster using the computer which would really impress the internet safety champions.

Please can your child complete their poster entry on the sheet attached. All entries need to be returned to school by Tuesday 14th February 2023.

The internet safety champions will then choose a winner from each class and these posters will be displayed around the school. Each child will receive a prize which will be presented to them during celebration assembly. I have attached some ideas to support your child with completing their poster. The more colourful, the better.

Happy poster creating!

Miss Gardner (Computing co-ordinator)
